

**GlobeTax provides tax reclaim services for financial institutions and their investor clients. Certain documentation is necessary to file tax reclaims. This documentation varies by beneficial owner type. eDocs will guide you through the process of creating the documents necessary for each beneficial owner.**

**This is a summary of the eDocs system. A detailed user guide follows.**

What is eDocs?

- **eDocs is an online account opening and document creation program, powered by GlobeTax, which allows our clients to log into a secure portal and submit beneficial owner information and manage document creation and delivery.**

What can I do in eDocs?

- **You can use eDocs to enter beneficial owner data either manually or by uploading an excel spreadsheet.**
- **The system will then use the information you have entered to populate the appropriate documents for each beneficial owner type.**
- **Once documents are created, you can choose to store them or e-mail them directly to yourself or your client for execution.**

How does it help me?

- **eDocs is a simple, efficient way to transfer sensitive beneficial owner data.**
- **eDocs is designed to streamline the account opening and documentation process. The system also makes it easier to submit data on behalf of multiple beneficial owners.**
- **eDocs will notify you of errors made when entering account information (such as leaving a necessary field blank or listing a non-physical address).**
- **eDocs allows you to view previously created documents and check their status.**

Will my data be protected?

- **GlobeTax treats beneficial owner data with the utmost sensitivity. We understand the importance of the security of your information and have created a secure uplink for this data, protected by a Symantec certified SSL with a minimum of 128-Bit encryption.**
- **To ensure security of beneficial owner information, users and managers will be required to change their password every 6 months (180 days).**
